Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates "in particular genus Homo" and leading to the emergence of Homo sapiens as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...

The cell (from Latin cella, meaning "small room") is the basic structural, functional, and biological unit of all known living organisms. A cell is the smallest unit of life. Cells are often called the "building blocks of life". The study of cells is called cell biology. Cells consist of cytoplasm enclosed within a membrane, which contains many biomolecules such as proteins and nucleic acids.

Becoming Human

1. Introduction. Autism spectrum disorder (ASD) is a group of neurodevelopmental conditions of unknown cause. It is highly likely that both genetic and environmental factors are associated with the onset and progress of ASD while the mechanisms underlying its aetiology are expected to be multifactorial , , , .Human exposure to aluminium has been implicated in ASD with conclusions being ...

Aluminium in brain tissue in autism - ScienceDirect

Decades-long efforts to map human disease loci, at first genetically and later physically (), followed by recent positional cloning of many disease genes and genome-wide association studies (), have generated an impressive list of disorderâ€™gene association pairs (4, 5).In addition, recent efforts to map the proteinâ€™protein interactions in humans (6, 7), together with efforts to curate an ...
