Project Overview. APA partnered with the National Renewable Energy Laboratory, Clarion Associates, and the American Wind Energy Association to produce Planning for Wind Energy with funding from the Department of Energy.. The report was developed under the auspices of the Green Communities Research Center, one of APA's National Centers for Planning.

Wind power in the United States is a branch of the energy industry that has expanded quickly over the latest several years. For the twelve months through November 2017, 254.2 terawatt-hours were generated by wind power, or 6.33% of all generated electrical energy.. As of January 2017, the total installed wind power nameplate generating capacity in the United States was 82,183 megawatts (MW).

This post reviews the weird and wonderful world of high altitude wind power. It looks into the reasons for wanting to go high, explains tethered flight and explores the main competing technologies of 1) airborne generation (Google Makani) and 2) ground based generation (KiteGen) and compares their strengths and weaknesses.
