

integrated science custom edition pdf

An integrated circuit or monolithic integrated circuit (also referred to as an IC, a chip, or a microchip) is a set of electronic circuits on one small flat piece (or "chip") of semiconductor material, normally silicon. The integration of large numbers of tiny transistors into a small chip results in circuits that are orders of magnitude smaller, cheaper, and faster than those constructed of ...

The 555 timer IC is an integrated circuit (chip) used in a variety of timer, pulse generation, and oscillator applications. The 555 can be used to provide time delays, as an oscillator, and as a flip-flop element. Derivatives provide two or four timing circuits in one package. Introduced in 1972 by Signetics, the 555 is still in widespread use due to its low price, ease of use, and stability.

Octopus chip cell capture: Inspired by the high efficiency of the prey mechanism of the octopus, an aptamer-tailed octopus chip (AP-Octopus-Chip) for CTC enrichment was developed. The design of the chip and the high binding affinity of the multivalent structures against the target cells significantly improved the CTC capture efficiency and enrichment.
