Project management is the practice of initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time. A project is a temporary endeavor designed to produce a unique product, service or result with a defined beginning and end (usually time-constrained, and often constrained by funding or staffing ...

- Project schedules put your juggling skills to the test. When you build a schedule, you try to complete the project scope by its deadline with the resources management gives you without blowing the project budget. To add to the challenge, the schedule keeps changing as work progresses. So your schedule has to be flexible, too.
