

key to metal bumping pdf

A lock is a mechanical or electronic fastening device that is released by a physical object (such as a key, keycard, fingerprint, RFID card, security token, coin etc.), by supplying secret information (such as a number permutation or password), or by a combination thereof.. A key is a device that is used to operate a lock (such as to lock or unlock it). A typical key is a small piece of metal ...

Lock (security device) - Wikipedia

A keychain, or keyring, is a small chain, usually made from metal or plastic, that connects a small item to a keyring. The length of a keychain allows an item to be used more easily than if connected directly to a keyring. Some keychains allow one or both ends the ability to rotate, keeping the keychain from becoming twisted, while the item is being used.
