

some decidability results on pdf

Background. The halting problem is a decision problem about properties of computer programs on a fixed Turing-complete model of computation, i.e., all programs that can be written in some given programming language that is general enough to be equivalent to a Turing machine. The problem is to determine, given a program and an input to the program, whether the program will eventually halt when ...

Halting problem - Wikipedia

In formal language theory, a context-free language (CFL) is a language generated by a context-free grammar (CFG).. Context-free languages have many applications in programming languages, in particular, most arithmetic expressions are generated by context-free grammars.

Context-free language - Wikipedia

The two-level lambda-calculus gives a functional operational semantics to nominal terms unknowns; the result is a lambda-calculus with capturing and capture-avoiding substitution are represented and nominal terms style alpha-equivalence for level 1 variables (atoms) in the presence of level 2 variables (unknowns).

Journal and conference papers by Murdoch Gabbay (Jamie)

Gödel's 1931 work left open the question of the decidability of mathematical propositions, and this is what Turing set out to answer. The particular technique of Gödel numbering was also influential in Turing's 1936 work. Gödel had shown how to encode theorems about numbers, as numbers.

Alan Turing Scrapbook - Turing Machines

Undergraduate Major in Computer Science. The Computer Science major emphasizes the principles of computing that underlie our modern world, and provides a strong foundational education to prepare students for the broad spectrum of careers in computing.

Department of Computer Science < University of California

CpSc 100: Introduction to Computing for Liberal Arts A pass/no credit course to provide an introduction to the computer capabilities needed to succeed in an Information Society. This course is designed to support the SRU Computer Competency requirement.

SRU Computer Science: Course Catalog

Indecision and delays are the parents of failure. The site contains concepts and procedures widely used in business time-dependent decision making such as time series analysis for forecasting and other predictive techniques
