#### **sounds-of-english**

A vowel sound is made by shaping the air as it leaves the mouth, we use the lips, tongue and jaw to make the shape. There are 11 shapes of the mouth in GB English, and 19 sounds in total (some sounds use two shapes). We use a variety of long, short and diphthong (double) sounds when speaking, though the actual length of a sound varies depending on how much stress we use.

Pronunciation refers to the perception and production of the significant sounds of a target language (or any language, in fact) in order to achieve meaning within the context of language use (Seidlhofer 56). To put it more simply, pronunciation is defined as the particular sounds we use in order to derive meaning (AMEP 1).
