The human body is a thing of wonder. Just when we set a limit for our body, someone comes forward with an incredible, new body record. Sometimes it's the thrill, some times it's the challenge, while at other times it's just an abnormality which enables a particular human body to break and set new limits.

### **10 Strange Human Body Records - Unbelievable Facts**

A Body-Fat Set Point In 1953, a British physiologist named Gordon Kennedy proposed that mammals regulate body fat using a system that tries to keep the amount of body fat at a certain level (the set point). It does so mostly by varying hunger. If your weight is below your set point, you will feel hungry. The further below, the more hunger.
