Analysis Methods for Complex Sample Survey Data. SurvMeth 614 (3 credit hours) Instructor: Yajuan Si, University of Michigan and Brady West, University of Michigan This course provides an introduction to specialized software procedures that have been developed for the analysis of complex sample survey data.

Description of Courses | ISR Summer Institute

Social network analysis (SNA) is the process of investigating social structures through the use of networks and graph theory. It characterizes networked structures in terms of nodes (individual actors, people, or things within the network) and the ties, edges, or links (relationships or interactions) that connect them. Examples of social structures commonly visualized through social network ...

8.2.1 The available grades and corresponding mechanical properties for SS, HSLAS, HSLAS-F, and UHSS

are shown in Table 4. 8.2.2 Tension Tests: 8.2.2.1 Requirements—Material as represented by the test specimen shall conform to the mechanical property require-

Standard Specification for Steel, Sheet and Strip, Hot

Abstract. This specification covers hot-rolled, carbon, structural, high-strength low-alloy, high-strength low-alloy with improved formability, and ultra-high strength steel sheet and strip, in coils and cut lengths.

ASTM A1011 / A1011M - 18a Standard Specification for Steel

1.1 This specification covers high-strength low-alloy structural steel shapes, plates, and bars for welded, riveted, or bolted construction but intended primarily for use in welded bridges and buildings where savings in weight or added durability are important. The atmospheric corrosion resistance of this steel in most environments is substantially better than that of carbon structural steels ...

ASTM A588 / A588M - 15 Standard Specification for High

2 In addition, designers try to position beams directly under heavy masonry walls to carry this weight directly into the supports or columns.

CE 382 L2 - Loads

Introduction. Prostaglandin E2 (PGE2) is the most widely produced prostanoid in the human body. It signals via four specific G-protein-coupled receptors: EP1–4, responsible for distinct biological outcomes. The engineering of mice deficient in each respective EP receptor enabled the elucidation of PGE2-mediated processes including inflammation, bone healing, regulation of gastrointestinal ...

Structural features of subtype-selective EP receptor

A network of disorders and disease genes linked by known disorder–gene associations offers a platform to explore in a single graph-theoretic framework all known phenotype and disease gene associations, indicating the common genetic origin of many diseases. Genes associated with similar disorders ...

In Physics, elasticity (from Greek ελαστικός, "ductible") is the ability of a body to resist a distorting influence and to return to its original size and shape when that influence or force is removed. Solid objects will deform when adequate forces are applied to them. If the material is elastic, the object will return to its initial shape and size when these forces are removed.

Elasticity (physics) - Wikipedia

Contains the electronic versions of 80 books previously published in hard copy as part of the Country Studies

Series by the Federal Research Division. Intended for a general audience, books in the series present a description and analysis of the historical setting and the social, economic, political, and national security systems and institutions of select countries throughout the world.
