Systems theory is the interdisciplinary study of systems. A system is a cohesive conglomeration of interrelated and interdependent parts that is either natural or man-made. Every system is delineated by its spatial and temporal boundaries, surrounded and influenced by its environment, described by its structure and purpose or nature and expressed in its functioning.

Today, companies know they must adapt quickly or die. They are increasingly seeking to adapt by using agile principles and practices - but many are still changing too slowly, and can't sustain change. Fortunately, a growing number of enterprises have found a far more effective solution: the Scaled Agile Framework (SAFe).
