Excavations - Safety Meeting Outlines, Inc.

In archaeology, excavation is the exposure, processing and recording of archaeological remains. An excavation site or "dig" is a site being studied. Such a site excavation concerns itself with a specific archaeological site or a connected series of sites, and may be conducted over as little as several weeks to over a number of years.

With over 500,000 users downloading 3 million documents per month, the WBDG is the only web-based portal providing government and industry practitioners with one-stop access to current information on a wide range of building-related guidance, criteria and technology from a 'whole buildings' perspective.

WBDG | WBDG - Whole Building Design Guide

Archaeology, or archeology, is the study of human activity through the recovery and analysis of material culture.The archaeological record consists of artifacts, architecture, biofacts or ecofacts and cultural landscapes.Archaeology can be considered both a social science and a branch of the humanities. In North America archaeology is a sub-field of anthropology, while in Europe it is often ...
