To find the n th vertex of P_d (starting from 0), write n in base 3, replace the k th digit by its difference from 2 if the number of 1s to the left is odd, and then increment each digit by 1. When two vertices differ only in position k , having 1 and 2 there, they are adjacent via a $1|2$ step in P_d if and only if all entries to the right are 3. When in position
