Early Programming Logic Control (P LC) were designed to replace relay logic systems. These PLCs were programmed in "Ladder Logic", which strongly resembles a schematic diagram of relay logic. Programming logic control has several features like protection from the open area conditions such dust, heat and cold.

DIFFERENT APPLICATIONS OF PROGRAMMABLE LOGIC CONTROLLER (PLC)

During the course of discussion about various digital logic gates, we have mainly discussed about the design, property and operation of them. In this article we will look at various applications of logic gates. Their applications are determined mainly based upon their truth table i.e. their mode of operations.
